AIRFRAME

the ultimate self-assembly exhibition kit

You can build  
this stand  
in less than  
**45mins!**

T3Airframe is the perfect display framing system and graphic carrier. It provides unbeatable flexibility and stability using just a few cleverly designed components.

Because T3Airframe is so easy to put together, you don't need expensive skilled labour, you can do it yourself. Structures can be assembled in just a few minutes.

And, at the end of your show or presentation, everything packs away quickly and neatly, which means that build and dismantling times are significantly reduced.

You can re-use your T3Airframe kit time and time again. Transportation and storage are easy too.

Quick, easy and versatile - it all adds up to the perfect self-assembly exhibition kit.

## Perfect for...

- exhibition stands
- presentation backdrops
- product launches
- display walls
- roadshows
- information panels
- bars & counters
- towers & showcases
- retail interiors
- point of sale

## How T3Airframe works

The key components to T3Airframe are an aluminium tube both straight and curved and a connector. These join together with a brilliantly simple, patented, twist-lock action, no tools required.

Straight and curved walls, towers, plinths and counters can all be constructed very quickly using just these few basic parts.

06

# quick, easy, versatile

Applying graphics to the framework is simple too. Magnetic tape on the sides, top and bottom of the graphics locate easily onto the tubes in much the same way as a pop-up kit. Long, flat or curved walls of seamless looking graphics can be successfully and quickly installed. Velcro can also be used instead of the magnetic tape when rigid panels are specified.

T3Airframe is very stable, easily supporting large plasma screens or countertops and shelves for heavy display items.

The square tube enables hinges, sliding door sections and full size lockable doors to be fitted with the minimum of fuss.

A full range of accessories are available to complete the 'exhibition stand in a box' experience.

## Components

<p><b>Adjustable foot</b> Twist to fit foot. Adjustable from 25mm to 70mm Available in 40, 55 and 70mm diameter sizes</p>	
<p><b>Blanking cap</b> Finishing cap for exposed nodes</p>	
<p><b>Connector</b> Connects tubes and components</p>	
<p><b>Straight tube</b> Twist to fit straight tube Standard lengths from 245mm to 1370mm</p>	
<p><b>Curved tube</b> Twist to fit curved tube Standard arcs to match straight tubes</p>	
<p><b>L-bar</b> Magnetic bar for graphic support on internal corner</p>	
<p><b>End stop</b> Black plastic plug for tube ends</p>	
<p><b>Non-adjustable foot</b> Foot for mid-length application</p>	
<p><b>Threaded insert</b> For use with non-adjustable feet</p>	
<p><b>Joiner</b> Joins two connectors</p>	

## Accessories

<p><b>Spotlights</b> 150W Halogen light with clamp</p>	
<p><b>Cases</b> Tough polypropylene wheeled cases available in two sizes</p>	
<p><b>Graphics drums</b> Tough polypropylene drum ideal for rollable graphics</p>	
<p><b>Bags</b> Soft carry bags available in three sizes</p>	
<p><b>Counter tops</b> Various sizes and finishes</p>	
<p><b>T-Hook</b> Graphic hanger for easy and secure panel attachment</p>	
<p><b>Graphic panels</b> Rollable &amp; printed graphic panels</p>	
<p><b>Graphic tape measure</b> For accurate measurement of curves</p>
